

HARSH KUMAR MISHRA

harshbdh123@gmail.com | 9565369151 | [GitHub](#) | [LinkedIn](#) | Lucknow, India

PROFILE

Computer Science undergraduate with hands-on experience in full-stack web development and AI-based applications. Skilled in React.js, Node.js, and MongoDB, with a strong grasp of RESTful API design, authentication, and backend architecture. Experienced integrating Generative AI and ML into recommendation, risk-analysis, and fraud-detection systems, with a focus on performance and end-to-end product delivery.

SKILLS

Languages: Java, Python, JavaScript

Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS

Backend: Node.js, REST API Development, Authentication Systems

Machine Learning / AI: Generative AI API Integration, scikit-learn, TF-IDF / Bag-of-Words, NLP Preprocessing

Database: MongoDB, Data Modeling

Tools: Git, GitHub, API Integration, Deployment (Vercel, Netlify)

EDUCATION

Bachelor of Technology (B.Tech) — Computer Science

S.R Institute of Management and Technology, Lucknow

2023 – 2027

Intermediate (12th Grade)

Subhash Smarak Public School, Kanpur

2023

EXPERIENCE

AI & ML Intern — 3Skill Training

Jul 2026

- Completed a 2-month AI & Machine Learning internship focused on practical, project-based, industry-oriented development.
- Applied ML and NLP concepts to build real-world applications as part of the internship curriculum.

PROJECTS

AI Career Advisor | *Full-Stack AI Recommendation System*

- Built a full-stack AI-powered career recommendation system that analyzes user skills and interests to generate personalized career paths and roadmaps via Generative AI APIs.
- Built RESTful backend APIs and structured MongoDB data models for processing user input and storing career insights.
- Implemented a responsive React and Tailwind CSS UI with optimized frontend-backend communication.

Ramanayam | *Full-Stack E-Commerce & Temple Service Platform*

- Built a full-stack e-commerce platform for Hindu ritual products with darshan slot booking functionality.
- Developed backend services and database schemas for product management, authentication, orders, and bookings.
- Deployed the platform with a responsive React frontend and scalable, secure backend architecture.

PharmaGuard AI | *Pharmacogenomic Risk Analyzer*

- Built a full-stack pharmacogenomic risk analysis tool that evaluates drug-gene interactions to flag potential adverse reactions.
- Integrated Generative AI APIs to interpret genomic/medication data and generate human-readable risk explanations via a Node.js REST backend.
- Designed MongoDB schemas for patient, medication, and genomic risk records, with a real-time React reporting frontend.

Fake Job Posting Detector | *ML-Based Fraud Identification System*

- Built a machine learning system to identify fraudulent job postings, training a scikit-learn classifier on labeled data.
- Applied NLP preprocessing and TF-IDF / Bag-of-Words vectorization, tuning for precision/recall to minimize false positives.
- Deployed the tool with a simple web interface for real-time job posting analysis.

CERTIFICATIONS

- IBM Cybersecurity Certificate — IBM (2023)
- AI Fluency: Frameworks and Foundations — Anthropic (2026)
- Claude Code in Action — Anthropic (2026)
- AI/ML Internship Completion Certificate — 3Skill (2026)
- Agents and Workflows — OpenAI Academy (2026)

TECHNICAL ACHIEVEMENTS

Generative AI Hackathon Participant — Hack2Skills × Google

2025

Hack With India Hackathon — Participant

2026

RIFT Hackathon — Semifinalist, PW Institute of Innovation

2026
