

HARSH KUMAR MISHRA

harshbdh123@gmail.com | 9565369151 | github.com/chessman2345788 | linkedin.com/in/harsh567 | Lucknow, India

PROFESSIONAL SUMMARY

B.Tech Computer Science student with full-stack development and AI/ML experience (2023-2027), with hands-on experience building responsive web applications using React.js and scalable backend APIs using Node.js and Express.js. Experienced in AI/ML projects involving NLP, machine learning, and Generative AI API integration. Looking for opportunities to apply my skills to real-world products while continuously learning, contributing, and growing as a software and AI engineer.

SKILLS

Frontend (React.js): React.js, React Hooks, Component Lifecycle, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, Responsive Web Design, REST API Integration

Backend (Node.js): Node.js, Express.js, RESTful API Design, Authentication and Authorization, Asynchronous Programming

Database: MongoDB, PostgreSQL, SQL, Data Modeling

Tools: Git, GitHub, Docker, Debugging, Troubleshooting, Performance Optimization, Deployment (Vercel, Netlify)

AI / ML: Prompt Engineering, Generative AI API Integration (OpenAI, Anthropic Claude), scikit-learn, NLP Preprocessing

Languages: JavaScript, TypeScript, Python, Java

EDUCATION

Bachelor of Technology (B.Tech) — Computer Science — S.R Institute of Management and Technology, Lucknow

2023 – 2027

Intermediate (12th Grade) — Subhash Smarak Public School, Kanpur

2023

EXPERIENCE

AI & ML Intern — 3Skill Training

Jul 2026 – Aug 2026

- Completed a 2-month, project-based internship in Artificial Intelligence and Machine Learning development.
- Applied Machine Learning and NLP techniques, including data processing and model development, to build real-world applications.

PROJECTS

Ramanayam — Full-Stack E-Commerce & Temple Service Platform (React JS, TypeScript, Node.js, PostgreSQL) — ramayanam.in | [GitHub](#)

- Built and launched a live React.js (TypeScript) storefront for Hindu ritual products with a product catalog, cart and checkout flow, and darshan slot booking, optimized for performance and mobile use.
- Developed responsive UI with reusable components and Framer Motion animations, integrated with RESTful Node.js/Express.js services and PostgreSQL schemas for products, authentication, orders, and bookings.
- Deployed end-to-end using Docker, taking the platform from local development to a publicly accessible live site.

AI Career Advisor — AI-Powered Career Recommendation System (React JS, Node.js, MongoDB)

- Built and deployed a full-stack app that analyzes user skills and interests to generate personalized career paths and roadmaps using Generative AI APIs.
- Developed a responsive React.js and Tailwind CSS interface and a Node.js/Express.js REST API with MongoDB data models; focused on prompt design and AI-driven recommendation quality.

VALORA — AI Transfer Value Prediction Platform — [GitHub](#)

- Built an ML-powered football transfer valuation web app with player profiles, value prediction, player comparison, and a methodology page explaining model outputs.
- Engineered 20 features and trained a tuned Extra Trees regression model, achieving R^2 of 0.5039 and MAE of €8.15M on a 105-sample held-out test set.

Fake Job Posting Detector — ML-Based Fraud Identification System — [GitHub](#)

- Trained a scikit-learn classifier using NLP preprocessing and TF-IDF / Bag-of-Words vectorization, tuned for precision and recall to minimize false positives.
- Deployed the model behind a web interface for real-time job posting analysis.

CERTIFICATIONS

- AI Fluency: Frameworks and Foundations — Anthropic (2026) | Claude Code in Action — Anthropic (2026)
- Agents and Workflows — OpenAI Academy (2026) | AI/ML Internship Completion Certificate — 3Skill (2026)
- IBM Cybersecurity Certificate — IBM (2023)

TECHNICAL ACHIEVEMENTS

- RIFT Hackathon — Semifinalist, PW Institute of Innovation (2026)
- Hack With India Hackathon — Participant (2026); Generative AI Hackathon — Hack2Skills × Google (2025)
